EMBASSY MODULAR STEEL SECURITY WALLING

THE SURE DEFENCE

PROTECT YOUR FAMILY AND VALUED POSSESSIONS

WITH AN EMBASSY SAFE / PANIC ROOM.

With over 30 years' experience providing high security physical protection products, Burton Security can provide the best solutions to protect your family and most valuable possessions. Working with you allows us to design the highest level of bespoke safe rooms and vaults for your family to take lifesaving shelter during a robbery, burglary, home invasion or terrorist attack.

EMBASSY MODULAR STEEL SECURITY

Walling

A safe room, or panic room as they are often called, provides a safe hiding place for your loved ones until your security team or the emergency services can be contacted.

Coordinating directly with your interior designer and architect ensures that we identify the protection level required to create safe rooms that are attack resistant, bullet proof, functional, safe and aesthetically pleasing.

We have a choice of security rooms and walling levels to protect against physical attack tools and ballistic weapons, such as pistols, handguns, and rifles. Additionally, our range of luxury armoured and sliding doors can be hidden from view, something that can be specified during the design process.

PRIVATE RESIDENCES, LUXURY APARTMENTS, YACHTS AND OFFICES

An Embassy safe / panic room or a vault can be built as a stand-alone room or we can discreetly convert existing areas of the home, such as bedrooms, walk in wardrobes, guest rooms, ensembles, living rooms, offices, and garages to keep your family and valuables safe from intruders.

Embassy panic rooms are ideal for high-net-worth individuals, dignitaries, and celebrities wanting to avoid life and death situations and protect the family in setting such as private residences, home offices, holiday homes, luxury apartments, and super yachts.

Our designs include adjoining rooms to create a central places of safety for the family with hidden armoured doors, manual or powered sliding doors, access control and window protection such as shutters, bar sets and bulletproof glass for the highest level of protection.

For larger ground floor installations designed to protect collections, art, classic cars, jewellery, precious metals, cash, and important documents we also have a range of strongrooms and vaults made from heavier steel and composite constructions.

High Security Doors

Armoured security doors at the property boundaries can provide an additional layer of protection and time critical safety so you can reach your panic room in safety!

Embassy Design

Enables architects and specifiers to embed secure design from the outset, creating the perfect balance of security and luxurious interior design.

Embassy modular security steel walling and rooms installed for maximum protection worldwide.

EMBASSIES, HOTELS AND SCHOOLS

In a world where the threat of terrorist attacks has become more common on Government embassies, hotels, retail areas, and sadly in schools too, the protection of personnel within safe areas of retreat has become more important to our way of living and is rightly now the everyday duty of care for many.

Our Embassy modular steel security walling is ideal for designing bespoke rooms or converting existing rooms to offer a high level of physical attack protection, ballistic resistant walling protection combined with bulletproof door sets creating the safe room required.

In these environments a well drilled emergency plan incorporating a designated, professionally designed safe room can save lives and help reduce the risk of robbery and hostage situations.

Working with your architects and designers each Embassy walling or safe room installation can be decorated discreetly to match its natural surroundings and create a hidden room or become part of a luxurious experience for clients, guests, visitors, pupils or staff.

Physical Security

Provides time delay. Delay equals safety and time to notify the Police authorities!

High Security Armoured Doors

We provide a large range of security door sets including traditionally hinged, luxury, and bespoke sliding door models!

Escape Rooms

An Embassy safe room is an ideal place of retreat and safety if under attack during a robbery, aggravated burglary or assault!

ARTS & LEISURE

It has been estimated by U.S. News that more than 50,000 pieces of artwork are stolen globally each year, and that 40% of these crimes are committed in the UK. In addition to the billions of pounds worth of loss attributed to these thefts, storage vault fires have accounted for many millions more. The risk to art, film and musical history has almost never been greater as general concerns surrounding worldwide security matters continue to grow, and as the threats from terrorism and armed robbery also remain high.

Our bespoke Embassy modular steel security walling, strongrooms, portable security rooms and vault systems are ideal for designing both fixed and temporary solutions to these threats. Suitable too for the conversion of existing rooms within buildings, vehicles, and yachts, Embassy offers a high level of physical attack protection, fire protection and ballistic resistance.

Whatever your requirements, choose Embassy security rooms and doors to create the ultimate protection against burglary, robbery, fire and armed assault.

ARCHITECTS, DESIGNERS & CONTRUCTION

Embassy modular steel security walling and our high security luxurious safes are ideal for designing bespoke rooms or converting existing rooms, offering a high level of physical attack protection, ballistic resistant walling protection combined with bulletproof door sets creating the safe room required.

We carefully listen to our clients so we can fully understand their security needs, concerns and lifestyle. With a collaborative approach with our clients, their designers and architects we work to exceed expectations in all that we deliver with that personal touch which makes us unique in our approach.

Following on from your preliminary discussion to assess your security needs, now your attention can turn to the finer details to ensure your chosen safe room compliments your lifestyle. Working with your designers we can combine innovative high security solutions with architecture and interior design to create wonderful living spaces to fit in with your lifestyle, bringing everything together to create a beautiful home.

Embassy is manufactured in the United Kingdom through design, innovation and investment in British engineering. We look forward to discussing your luxury bespoke requirements with our professional team as

part of our fully comprehensive consultation. Offering our customers not only unique, bespoke safe and panic rooms but a complete range of products for your home and business that will protect your most valuable possessions.

Working with your professionals drawn from architecture, interior design, construction and project management fields we can provide an exclusive range of exquisite safes using the finest materials. All hand finished using the best British craftsmanship to give the safe your personal touch.

Ultimate Privacy

We offer peace of mind that your security project will be discreetly designed, managed and installed by our expert UK team.

Our team will ensure that everything is taken care of, from design to install we give you complete transparency and privacy.

Trusted

Product quality, trust, honesty, reliability and professionalism provided as standard throughout the whole journey

Expertise

We have a wealth of expertise in-house that sets our services apart in the world of personal and valuables protection in a luxury setting

RETAIL AND COMMERCIAL

From the world's most advanced safe deposit centres in Hong Kong, to securing cash, bullion and valuables in banks and retailers across Europe and the Middle East; the team at Burton Security have the experience to advise, design, and deliver physical security solutions to protect you, your staff and your assets.

Embassy modular steel security walling, vaults and high security doors are ideal for designing bespoke rooms or converting existing rooms to offer a high level of physical attack protection, ballistic resistance, and controlled access or fire escape.

Our security solutions and safes can be found in most high street stores, superstores, banks, safe deposit centres, and protecting high street ATM's.

Unfortunately, the current cost of living crisis has seen a huge increase in theft from supermarkets. Working with heads of security we have designed anti-theft solutions to protect the stored cash within self-checkout machines, safely prevent snatch theft shoplifting via fire escapes, supply trolleys to aid the safe transit of cash through busy stores, and the ever-important service and daily management of all types of onsite security assets.

With a burgeoning reputation for providing turnkey solutions Burton Security are the perfect partner for anyone considering investing in the security of safe deposit centres, sanctuary rooms for high-net-worth individuals, cash handling areas, retail stores, bookmakers, banks, and home security too.

TECH TALK

1001.01 is a technical document that specifies the performance requirements that equipment should meet to satisfy the needs of certification and procurement bodies as well as the individual user.

We have a large range of bespoke and off the shelf solutions developed for storing guns, protecting personnel in armouries, at shooting ranges, and which provide physical security protection when threatened with a firearm.

Our modular layered approach to designing and manufacturing Embassy walling means we can apply levels of materials that are fully tested and certified to BR1 to BR7, EN1522 FSG, and EN1523 FSG standards for ballistic resistant protection.

Personnel protection for the inside of gun rooms, safe room or areas used for firing weapons can be lined with our coatings developed and fully tested at Precision Ballistics Laboratories to test procedure 1001.01 for Anti-Spall and Anti-Ricochet properties.

Embassy modular steel security walling is ideal for designing a layered approach for building secure rooms and portable rooms that can include physical security, ballistic protection and anti-ricochet protection.

For smaller or additional secure gun storage and gun collection displays we have a full range of Sold Secure tested, police preferred gun safes and high security luxury glass display safes.

Burton Security's core principle is to ensure products are tested to the highest standards. We are proud to have tested products to LPCB standards and feature in Red Book Live.

DESIGN & INNOVATION THE SURE DEFENCE TEAM

We are proud to manufacture our Embassy modular steel security walling and safe room products here in the UK. Our growth is through design, innovation and investment in British engineering.

Each project is managed and designed in house meaning we can offer a full turnkey security solution starting with a dedicated security team of experts who will discuss your requirements and start putting your concept plans into a working design.

Our design team will then create CAD drawings to match your space and the security protection level required, followed with a quotation which will be prepared for you to review.

Once the security design project has been agreed you will be introduced to a dedicated project manager who will oversee the whole production and installation process, starting with the all-important on-site survey.

Your bespoke Embassy walling or room will then go into production at our own fabrication workshops, ready for our skilled and fully vetted safe & vault installation engineers to install on site.

ORTHRUS Strongrooms

**LPS1175: Issue 8 F10 (SR6) and G5
Certified Room**

Protecting People And Valuables

LPS1175: Issue 8
Cert No: 1000 k

A free-standing high security solution of modular construction, Orthrus delivers optimum price/performance ratio. It is certified to the very latest LPS standard – LPS1175: Issue 8 and has achieved security rating F10 (SR6) G5. Each room is built to order according to the individual size and security requirements of the client. The flexibility of design and build allow this to be the perfect solution in the commercial world for high value items or indeed military/government use for sensitive materials or meeting spaces.

- Free-standing high security safe room
- Modular construction to create bespoke rooms built to your specification
- Orthrus rooms Independently tested and certified to LPS1175 (Issue 8) F10 (SR6) G5
- Built to a Police Preferred Specification -Secured by Design
- Ideal solution for creating a secure space within an existing structure
- Ideal for commercial, military and government use
- Exceeds requirements of the UK Environment Agency for the storage of radioactive source material/equipment
- Panel widths range from 150mm to 1500mm
- Rooms can be 5 or 6 sided
- Design, consultancy service and installation provided by Burton Safes
- The door and locking system can be connected to client's own alarm system and access control system
- A 2nd or 3rd lock can be added to your vault door if required
- Lock features 4 manager codes, 36 user codes, time delay and time windows, dual user functions and audit trails
- Optional emergency door, access hatch, pass through door is available

Certified Range	1810 - 3950	510 - 1950	160	900
Emergency Door (in wall panels)	510	1068	160	450

*without additional steel supports

Our Vaults are unrivalled in its success, due to the modular nature of its design, and the scalable levels of security.

- Independently tested and certified to EN1143-1 Grades 1 - 13
- Grades 6 - 13 have been tested and certified to EX, providing additional protection against explosives
- Grades 8 - 13 have been tested and certified to CD, providing special protection against core drills
- Insurance approved by the AiS
- Built to a Police Preferred Specification - Secured by Design
- Designed to suit your size and security requirements
- Panels can be provided in lengths of up to 3600mm and can be fitted with cable and ventilation holes if required
- Mounting plates for seismic detectors can be added to your vault
- Steel cladding for the exterior is available on request
- Burton Safes offer a full consultation, design and building service. Upon completion the room is inspected and registered with VDS
- All Cerberus doors come with 2 locks as standard and a third can be ordered on request. The locks are located on the outside only

- Cerberus doors can be supplied with key, mechanical combination or electronic locks
- Electronic locks can offer redundant systems, dual user, time delay, time lock, duress alarms, audit trails, one time codes, remote programming and tiered access rights
- All doors can only open outwards and can open 180°
- An emergency door can be integrated into the main vault door or installed as a separate door*
- A day gate can be fitted to the main vault door on request and comes with a single key lock and a second key or electric strike
- Exit handles and hydraulic closers can be added on request

Locking Options

*Integrated door in door only available on Grades 1-3

Vault Model	Grade (EN1143-1)	Wall Thickness	Weight p/m2	Standard Door Aperture	Weight of Standard Door
